

# OpenDNSSEC User Reference Material

## Overview

This page is a home for reference material related to OpenDNSSEC provided by the user community. The aim is for users to be able to share presentations and information on topics such as:

- How they run OpenDNSSEC
  - HA configurations
  - Policy considerations
  - ...
- Procedures they may use
  - Backup
  - Migration
  - Disaster recovery
  - ...
- Troubleshooting tips not currently covered on the main documentation pages (please add into or under the existing [Troubleshooting](#) page)

A [user account](#) is required to upload material to this area - log in or sign up using the links at the top right of the page.

This is a companion site to the user mailing list which is available at: <https://lists.opendnssec.org/mailman/listinfo/opendnssec-user> Please consider sending an email to the user mailing list to alert users to new material on this page!

## Content

DISCLAIMER: The information here is provided directly by the user community for the user community and is **not** exhaustively reviewed by the OpenDNSSEC team. We recommend verifying the information provided before use 😊

The site will be periodically reviewed to ensure content is relevant and usefully organised.

As a suggestion we recommend that each main contribution is made on a separate page where the following information is provided:

- Organisation and contact name
- OpenDNSSEC version used at time of writing
- Other useful configuration information such as hardware used, platform, database backend, etc.
