

Getting Support

You can receive support by creating a support issue in our [Issue Tracker](#) or sending an email to our [OpenDNSSEC user mailing list](#).

You will have to create an account in order to create issues.

The image shows a 'Create Issue' dialog box. The title bar contains a plus icon and the text 'Create Issue'. The dialog has two dropdown menus: 'Project:' with 'Support' selected, and 'Issue Type:' with 'Support' selected. At the bottom are 'Create' and 'Cancel' buttons. A yellow highlight is under the 'Create Issue' link in the page footer.
